

Year 1 Blackbirds

Well that's another week over and another week Blackbirds have continued to amaze me with their hard work!

We have continued working on our phonics skills by identifying pseudo and alien words. We have also created our own High Frequency word trees.

During English this week we have been looking at the story 'The Smeds and the Smoos'. As we imagined we were zooming through space, we drew a new planet that we discovered. While we were on our imaginary planet we wrote a post card to one of our friends from home.

In maths Blackbirds have continued to look at capacity. We began by ordering containers by their maximum capacity. We then investigated how many of the small containers we would need to fill the medium container, and the same for the medium filling the larger container. Once we found this out we were able to tell you how many we would need if there were two large containers.

We play measuring in the bath !!! We look at different volumes.

We have continued to be super busy with our topic work. We have been on nature walks for science, identifying wild plants and flowers that grow. We have loved singing with Kelly, investigating our names, making bookmarks and creating decorations for VE day.
