

Our topic focus this week has been **science**. We have designed our own investigations and used scientific vocabulary and reasoning to determine the odd one out!

Does size determine whether a fruit will float?

We have had fun creating **art** from everyday objects!

Finally we have been showing off our skills and talents by teaching Mrs Garbett a new skill!

So far I've been taught; a song on the piano, how to draw a dog, a street dance routine!, the Maccarina, a gymnastics move, how to score a goal in football, how to do a handstand and how to do a one handed cartwheel!

By the time we are back at school I will be full of new talents! I am working on them Year 3!
